DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 USC 121:

- I. Claims 1-15, drawn to **data storage method/management** , classified in class 713, subclass 193.
- II. Claims 16-23, drawn to **protecting a database system from external analysis and attack**, classified in class 713, subclass 201.

1. Invention of groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In this instant case, group II has separate utility by protecting a database system from external analysis and attack. See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Linda Thayer on 01/21/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
